

# SmartCalc v1.0

## Contents

- 0. Installation
- 1. Calculator
- 2. Deposit calculator
- 3. Ccredit calculator
- 4. Graph

## Installation

Go to source folder from terminal and run command: `> make install`

App is in the s21\_calc folder and named "Calculator"

## Calculator

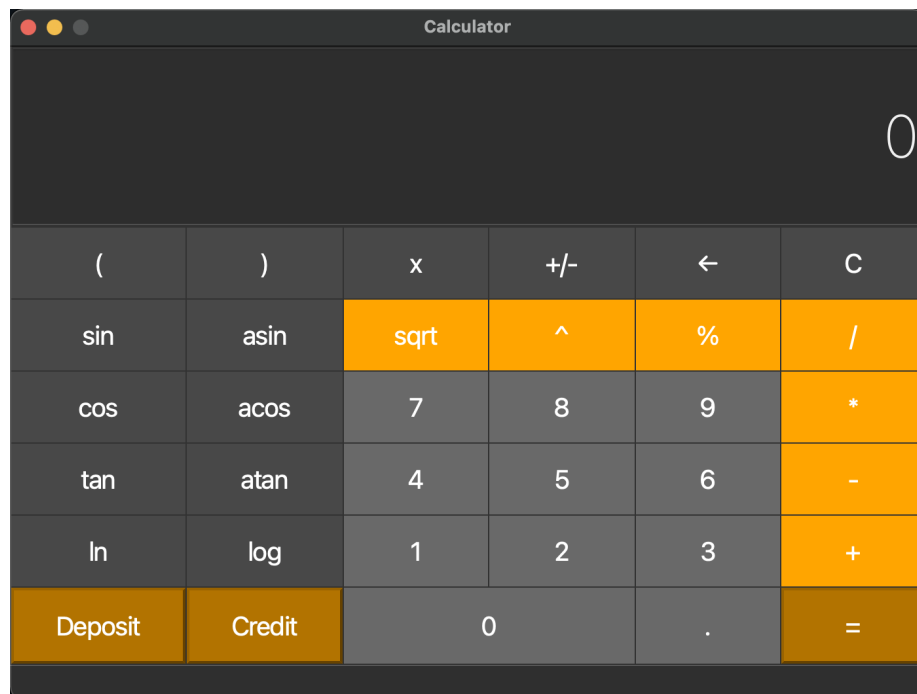

Figure 1: Calc

MainWindow

Сумма вклада

Срок размещения  Дней

Процентная ставка  % годовых ☐ Капитализация процентов

Налоговая ставка

Периодичность выплат

Пополнения

Частичные снятия

Figure 2: Deposit

The image shows a screenshot of a software application window titled "MainWindow". The window has a dark gray background and standard macOS-style window controls (red, yellow, and green buttons) in the top-left corner. The interface is organized into several sections:

- Input Fields:** At the top, there are three labels with corresponding input boxes: "Amount of loan:", "Interest rate:", and "Loan term:". Each input box is currently empty.
- Radio Buttons:** Below the input fields, there are two radio button options:
  - ☐ Equal total payment plan
  - ☐ Equal principal plan
- Calculate Button:** A prominent orange button with the text "Calculate" is located below the radio buttons.
- Output Area:** The bottom half of the window is a large, empty dark gray rectangular area, presumably for displaying the results of the calculation.
